

Grammarcetamol — User Stories & Acceptance Criteria

Document Version: 1.0
Status: Draft
Last Updated: 2026-07-31
Product: Grammarcetamol Digital Learning Ecosystem

1. Introduction

This document translates the Grammarcetamol Product Vision into actionable, testable user stories. Each story follows the standard **Connextra format**:

As a [type of user],
I want [some goal],
So that [some reason/benefit].

Every story is accompanied by **acceptance criteria** (Given-When-Then), **priority** (MoSCoW), and **estimation complexity** (T-shirt sizing) to guide sprint planning and development.

2. User Personas

ID	Persona	Description	Primary Goal
P1	Guest Visitor	Unauthenticated individual exploring the platform for the first time	Evaluate platform credibility and discover relevant courses
P2	Registered Student	Authenticated learner enrolled in one or more courses	Master English communication through structured learning
P3	Super Admin	Platform owner with unrestricted system access	Manage the entire business, content, and revenue efficiently
P4	Moderator	Trusted assistant with configurable permissions	Support content publishing, student engagement, and operations
P5	Instructor	Subject matter expert delivering live or recorded content	Deliver high-quality instruction and interact with learners

3. Epic: Guest Experience & Discovery

US-GUEST-001: Landing Page Discovery

As a Guest Visitor,
I want to understand what Grammarcetamol offers within seconds of landing,

So that I can decide whether the platform is relevant to my learning needs.

Acceptance Criteria:

- **Given** I navigate to the homepage,
- **When** the page loads,
- **Then** I see a hero section answering: (a) What is Grammarcetamol?, (b) Why should I care?, (c) What should I do next?
- **And** the primary CTA “Start Learning” and secondary CTA “Explore Courses” are visible above the fold.

Priority: Must Have

Complexity: S

US-GUEST-002: Browse Course Catalog

As a Guest Visitor,

I want to browse available courses without creating an account,

So that I can evaluate content quality before committing to registration.

Acceptance Criteria:

- **Given** I am on the course catalog page,
- **When** I view the listings,
- **Then** each course card displays: thumbnail, title, short description, instructor name, difficulty level, price, rating, and student count.
- **And** I can filter by category, difficulty, and price (free/paid).
- **And** I can search courses by keyword.

Priority: Must Have

Complexity: M

US-GUEST-003: View Course Details

As a Guest Visitor,

I want to view detailed information about a specific course,

So that I can make an informed enrollment decision.

Acceptance Criteria:

- **Given** I click on a course card,
- **When** the course detail page loads,
- **Then** I see: full description, learning objectives, target audience, prerequisites, module outline, instructor profile, testimonials, and pricing.
- **And** premium lesson content is locked with a prompt to enroll/purchase.

Priority: Must Have

Complexity: M

US-GUEST-004: Explore Services

As a Guest Visitor,

I want to learn about Grammarcetamol's professional services,

So that I can determine if specialized training or consultancy fits my needs.

Acceptance Criteria:

- **Given** I navigate to the Services section,
- **When** I view the offerings,
- **Then** I see all seven flagship services with professional illustrations, brief summaries, and "Learn More" buttons.
- **And** clicking a service reveals: benefits, target audience, duration, pricing (if applicable), and registration process.

Priority: Must Have

Complexity: M

US-GUEST-005: Submit General Enquiry

As a Guest Visitor,

I want to contact Grammarcetamol with questions before registering,

So that I can resolve concerns and build trust.

Acceptance Criteria:

- **Given** I am on the contact/enquiry page,
- **When** I fill in the enquiry form with name, email, subject, and message,
- **Then** the enquiry is submitted successfully.
- **And** I receive an auto-confirmation email.
- **And** the admin receives a notification.

Priority: Should Have

Complexity: S

US-GUEST-006: Seamless Authentication Redirect

As a Guest Visitor,

I want to be redirected back to my intended action after logging in,

So that I don't lose context or have to re-navigate.

Acceptance Criteria:

- **Given** I attempt an authenticated action (e.g., enroll, purchase, join live class),
- **When** I am prompted to log in and successfully authenticate,
- **Then** I am automatically returned to the exact action I was attempting.
- **And** a contextual message displays: “Please log in to continue your enrollment.”

Priority: Must Have

Complexity: S

4. Epic: Student Authentication & Onboarding

US-STU-001: Account Registration

As a prospective student,

I want to register using email/password or Google OAuth,

So that I can create a secure account quickly.

Acceptance Criteria:

- **Given** I am on the registration page,
- **When** I provide valid email, password (min. 8 chars, mixed case, number), and confirm password,
- **Then** my account is created and marked as pending verification.
- **And** a verification email is sent within 60 seconds.
- **And** a welcome email is dispatched.
- **And** a default student profile is initialized.
- **And** notification preferences are set to default values.
- **And** Google OAuth registration creates an account without requiring password setup.

Priority: Must Have

Complexity: M

US-STU-002: Email Verification

As a newly registered student,

I want to verify my email address,

So that I can unlock full platform access and receive important communications.

Acceptance Criteria:

- **Given** I receive a verification email,
- **When** I click the verification link (valid for 24 hours),
- **Then** my account status changes to “verified.”
- **And** I am redirected to the student dashboard with a success toast.
- **And** if the link expires, I can request a new verification email.

Priority: Must Have
Complexity: S

US-STU-003: Secure Login

As a registered student,
I want to log in securely via email/password or Google,
So that I can access my personalized learning environment.

Acceptance Criteria:

- **Given** I am on the login page,
- **When** I enter valid credentials,
- **Then** I am authenticated and redirected to the Student Dashboard.
- **And** after 5 failed attempts, the account is temporarily locked for 15 minutes.
- **And** a “Forgot Password” flow allows secure reset via email.
- **And** Google OAuth login bypasses password entry.

Priority: Must Have
Complexity: M

5. Epic: Student Dashboard & Learning Hub

US-STU-004: Personalized Dashboard Overview

As a registered student,
I want to see a dashboard that answers my immediate learning questions,
So that I can quickly resume learning and stay organized.

Acceptance Criteria:

- **Given** I log in successfully,
- **When** the dashboard loads,
- **Then** I see:
 - **Welcome Card:** Personalized greeting, learning streak (future), recent achievements.
 - **Continue Learning:** Last watched course with resume button and progress percentage.
 - **My Courses:** Tabbed view of Purchased, Free Enrolled, Completed, and Recently Updated courses.
 - **Upcoming Live Classes:** Date, time, instructor, join button, and countdown timer.
 - **Notifications:** Recent announcements, course updates, payment confirmations, class reminders.
 - **Recommended Courses:** Suggestions based on purchase history, categories, and popularity.

Priority: Must Have
Complexity: L

US-STU-005: Resume Learning with Progress Persistence

As a student returning to a course,

I want to resume exactly where I left off,

So that I don't waste time re-watching content or losing my place.

Acceptance Criteria:

- **Given** I previously watched a video lesson,
- **When** I click "Resume" or return to that course,
- **Then** the video player starts at the exact timestamp where I stopped.
- **And** progress is auto-saved every 5 seconds of watch time.
- **And** if the browser crashes or closes unexpectedly, progress is preserved.
- **And** module and lesson completion status is visually indicated (locked, in-progress, completed).

Priority: Must Have

Complexity: M

US-STU-006: Course Enrollment — Free

As a registered student,

I want to enroll in free courses instantly,

So that I can begin learning without payment friction.

Acceptance Criteria:

- **Given** I am viewing a free course,
- **When** I click "Enroll for Free,"
- **Then** enrollment is created instantly.
- **And** the course appears in "My Courses" immediately.
- **And** I receive an enrollment confirmation notification and email.

Priority: Must Have

Complexity: S

US-STU-007: Course Purchase & Checkout

As a registered student,

I want to purchase a paid course through a branded, seamless checkout,

So that I can access premium content securely and immediately.

Acceptance Criteria:

- **Given** I click "Buy Now" on a paid course,
- **When** the checkout page loads,

- **Then** I see: course title, thumbnail, instructor, price, discount (if applicable), taxes (if applicable), and total payable amount.
- **And** I can review/edit my details: full name, email, phone number.
- **And** I can select a payment method integrated through the chosen gateway.
- **And** upon successful payment:
 - Transaction is recorded.
 - Enrollment is created instantly.
 - Success confirmation is displayed visually.
 - Confirmation email and notification are sent.
 - Course appears immediately in “My Courses.”
- **And** failed payments display a clear error message with retry option.

Priority: Must Have

Complexity: L

US-STU-008: Interactive Learning Interface

As a student enrolled in a course,

I want a premium, distraction-free learning interface,

So that I can focus entirely on mastering the content.

Acceptance Criteria:

- **Given** I open an enrolled course,
- **When** the learning interface loads,
- **Then** the layout includes:
 - **Left Sidebar:** Course modules, lessons, progress indicators, locked/completed/current lesson states.
 - **Main Area:** Video player, lesson notes, downloadable resources, assignments placeholder, transcript placeholder.
 - **Right Sidebar:** Instructor info, downloads, discussion panel, bookmarks, personal notes.
 - **Below Video:** Previous/Next lesson navigation, “Mark Complete” button, “Leave Review” link, “Download Materials” button.
- **And** the interface is responsive across desktop, tablet, and mobile.
- **And** keyboard shortcuts are supported for playback control.

Priority: Must Have

Complexity: L

US-STU-009: Live Classroom Participation

As a student,

I want to join scheduled live classes directly from my dashboard,

So that I can benefit from real-time instruction and interaction.

Acceptance Criteria:

- **Given** I have registered for a live class,
- **When** I view my dashboard within 15 minutes of class start,
- **Then** I see a prominent “Join Class” button.
- **And** I cannot join before the scheduled start time (button is disabled with countdown).
- **And** after the session ends, the join button is replaced with a “Class Ended” status.
- **And** I receive reminder notifications: 24 hours, 1 hour, and 15 minutes before class.
- **And** the meeting link or integrated video platform launches correctly.

Priority: Must Have

Complexity: M

US-STU-010: One-on-One Coaching Booking

As a student seeking personalized help,

I want to book a private coaching session with an instructor,

So that I can receive targeted guidance on my specific challenges.

Acceptance Criteria:

- **Given** I navigate to the coaching section,
- **When** I select an instructor (if multiple),
- **Then** I see their available date and time slots.
- **And** I can select a slot and confirm the booking.
- **And** if payment is required, I complete checkout before confirmation.
- **And** I receive a booking confirmation email and calendar invite (ICS).
- **And** reminder notifications are sent 24 hours and 1 hour before the session.
- **And** administrators can view and manage all bookings to avoid conflicts.

Priority: Should Have

Complexity: L

US-STU-011: Service Request Submission

As a student or visitor,

I want to request professional services (e.g., corporate training, consultancy),

So that I can access specialized language support beyond standard courses.

Acceptance Criteria:

- **Given** I select a service from the catalog,
- **When** I complete the request form with relevant details (organization, needs, preferred dates, contact info),
- **Then** the submission is stored in the backend.
- **And** I receive a confirmation email with a reference number.
- **And** the administrator receives an in-app and email notification.
- **And** I can track the status of my request (Received → Under Review → Responded → Scheduled → Completed).

Priority: Should Have

Complexity: M

US-STU-012: Leave Course Reviews

As a student who has completed (or substantially progressed through) a course,
I want to leave a rating and written review,
So that I can share my experience and help future learners decide.

Acceptance Criteria:

- **Given** I have completed at least 50% of a course,
- **When** I click “Leave Review,”
- **Then** I can submit a star rating (1–5) and written feedback.
- **And** my review appears after admin moderation (if enabled).
- **And** I can edit or delete my review within 7 days.
- **And** the average course rating updates dynamically.

Priority: Should Have

Complexity: S

US-STU-013: Profile Management

As a registered student,
I want to manage my personal profile and preferences,
So that my learning experience is personalized and my data is accurate.

Acceptance Criteria:

- **Given** I navigate to my profile settings,
- **When** I edit my details,
- **Then** I can update: profile picture, full name, email, phone, country, timezone, biography, learning goals.

- **And** I can change my password (requires current password confirmation).
- **And** I can manage notification preferences (email, in-app, marketing).
- **And** I can view and disconnect my linked Google account.
- **And** I can adjust privacy settings (profile visibility, activity sharing).
- **And** all changes are saved with a success confirmation.

Priority: Must Have

Complexity: M

US-STU-014: Notification Center

As a registered student,

I want to receive and manage notifications in one place,

So that I stay informed without being overwhelmed.

Acceptance Criteria:

- **Given** I am logged in,
- **When** I click the notification bell,
- **Then** I see a dropdown/panel with recent notifications grouped by category (Courses, Payments, Live Classes, Announcements, System).
- **And** unread notifications are visually distinguished.
- **And** I can mark individual or all notifications as read.
- **And** clicking a notification navigates directly to the relevant page.
- **And** I receive notifications for: purchase confirmations, enrollment confirmations, new course releases, course updates, live class reminders, session reminders, service request updates, payment confirmations, announcements.

Priority: Must Have

Complexity: M

US-STU-015: Download Learning Resources

As a student enrolled in a course,

I want to download supplementary materials (PDFs, worksheets, audio),

So that I can study offline and reinforce my learning.

Acceptance Criteria:

- **Given** I am in a course lesson,
- **When** I view the resources section,
- **Then** I see a list of available downloadable files with file type and size.
- **And** clicking "Download" initiates the file download securely.

- **And** download history is tracked for analytics.
- **And** large files show a progress indicator.

Priority: Should Have

Complexity: S

6. Epic: Admin Dashboard & Operations

US-ADM-001: Operational Dashboard Overview

As a Super Admin,

I want a centralized dashboard that displays the health of the business at a glance,

So that I can make informed decisions quickly without navigating multiple pages.

Acceptance Criteria:

- **Given** I log into the admin portal,
- **When** the dashboard loads,
- **Then** I see key metrics displayed as clean, clickable cards:
 - Total registered students
 - Active students (last 30 days)
 - New registrations (today/this week/this month)
 - Published courses / Draft courses
 - Total revenue / Revenue this month
 - Pending payments / Completed transactions
 - Upcoming live classes
 - Open support tickets
 - Pending service requests
 - Total reviews / Average course rating
- **And** each metric is clickable, drilling down to a detailed report.

Priority: Must Have

Complexity: L

US-ADM-002: Quick Actions Panel

As a Super Admin,

I want one-click access to frequent administrative tasks,

So that I can perform common actions efficiently.

Acceptance Criteria:

- **Given** I am on the admin dashboard,

- **When** I view the Quick Actions section,
- **Then** I see buttons for: Create New Course, Schedule Live Class, Publish Announcement, Add Moderator, Send Notification, Review Pending Uploads, View Financial Report.
- **And** clicking each button navigates directly to the relevant workflow.

Priority: Must Have

Complexity: S

US-ADM-003: Real-Time Activity Feed

As a Super Admin,

I want to see a live feed of platform events,

So that I can monitor activity and respond to issues proactively.

Acceptance Criteria:

- **Given** I am on the admin dashboard,
- **When** I view the Activity Feed panel,
- **Then** I see real-time events including: new student registrations, completed purchases, failed payment attempts, new reviews, course publications, upload failures, support ticket creation, service requests, upcoming classroom reminders.
- **And** events are timestamped and link to relevant detail pages.
- **And** I can filter by event type and date range.

Priority: Should Have

Complexity: M

US-ADM-004: Revenue Analytics & Visualization

As a Super Admin,

I want interactive charts showing revenue performance,

So that I can identify trends and optimize business strategy.

Acceptance Criteria:

- **Given** I navigate to the Revenue section,
- **When** I view the analytics dashboard,
- **Then** I see interactive visualizations for:
 - Daily, weekly, and monthly revenue trends (line/bar charts)
 - Best-selling courses (ranked list)
 - Revenue by course category (pie/donut chart)
 - Payment success vs. failed transactions (stacked bar)
- **And** I can filter by date range (last 7 days, 30 days, 90 days, custom).

- **And** data exports to CSV/Excel are supported.

Priority: Must Have

Complexity: L

US-ADM-005: Student Engagement Insights

As a Super Admin,

I want detailed analytics on student behavior and engagement,

So that I can improve content and increase retention.

Acceptance Criteria:

- **Given** I navigate to the Student Insights section,
- **When** I view the reports,
- **Then** I see:
 - Most active learners (by time spent, lessons completed)
 - Course completion rates (overall and per-course)
 - Most enrolled courses
 - Least engaged students (at-risk flagging)
 - Popular search keywords
 - Average learning time per session and per course
 - **And** at-risk students are flagged with automated suggestions for re-engagement.

Priority: Should Have

Complexity: L

7. Epic: Course Management (Admin)

US-ADM-006: Guided Course Creation Workflow

As a Super Admin or Moderator,

I want a step-by-step wizard for creating courses,

So that I can publish high-quality content without errors or omissions.

Acceptance Criteria:

- **Given** I start creating a new course,
- **When** I proceed through the wizard,
- **Then** I complete the following steps:
 1. **Course Information:** Title, subtitle, description, learning objectives, target audience, prerequisites, category, difficulty, language, estimated duration, cover image, promotional video (optional), tags. Auto-saved as Draft.

2. **Pricing & Availability:** Free/Paid toggle, price, discount price (optional), enrollment period (optional).
3. **Build Structure:** Create modules, add lessons, reorder via drag-and-drop, move lessons between modules, duplicate modules/lessons, delete modules, attach resources.
 - **And** all changes are auto-saved.
 - **And** I can exit and resume later without losing progress.

Priority: Must Have

Complexity: XL

US-ADM-007: Resumable Chunked Upload System

As a Super Admin or Moderator,

I want to upload large video files reliably with resume capability,

So that network interruptions never force me to restart uploads from scratch.

Acceptance Criteria:

- **Given** I initiate a course upload,
- **When** files are selected,
- **Then** the system splits files into chunks (configurable size, e.g., 5MB).
- **And** an Upload Session is created tracking: course ID, status, uploaded/failed/pending lessons, progress percentage, upload token, expiration time.
- **And** if the browser closes or network fails, I can resume from the last successful chunk.
- **And** multiple lessons upload in parallel (3–5 concurrent, adaptive to network).
- **And** the interface shows: overall course progress bar, per-lesson status (Uploaded , Uploading..., Waiting..., Failed → Retry).
- **And** duplicate uploads are prevented via checksum comparison.

Priority: Must Have

Complexity: XL

US-ADM-008: Atomic Course Publishing

As a Super Admin,

I want courses to be published only after complete validation,

So that students never encounter broken or incomplete content.

Acceptance Criteria:

- **Given** I click “Publish Course,”
- **When** the system validates,
- **Then** it verifies: every required file is uploaded, checksums match, metadata is complete, module/lesson relationships are intact, thumbnail is present, pricing is set.

- **And** if any validation fails, publishing is blocked with a detailed error list.
- **And** the course transitions atomically from “Review” to “Published.”
- **And** enrolled students receive a “New Course Available” notification.

Priority: Must Have

Complexity: L

US-ADM-009: Course Editing & Versioning

As a Super Admin,

I want to update published courses while preserving student history,

So that content stays current without disrupting existing learners.

Acceptance Criteria:

- **Given** I edit a published course,
- **When** I make changes,
- **Then** I can update: title, description, pricing, thumbnail, modules, lessons, resources.
- **And** adding new lessons notifies enrolled students and sets their progress to 0%.
- **And** removing a lesson warns me if students have viewed it; option to archive instead of delete.
- **And** every significant update creates an internal version record (audit history).
- **And** students always access the latest published version.
- **And** rollback to a previous version is supported.

Priority: Must Have

Complexity: L

US-ADM-010: Safe Course Deletion & Archival

As a Super Admin,

I want strict rules around course deletion,

So that I don't accidentally remove content with active enrollments or revenue history.

Acceptance Criteria:

- **Given** I attempt to delete a course,
- **When** the system checks constraints,
- **Then** deletion is blocked if: active enrollments exist, purchases have been made, transactions are recorded, or students have recorded progress.
- **And** blocked courses can be “Archived” instead (hidden from new enrollments, accessible to existing students per business rules).
- **And** only courses with zero enrollments, zero purchases, and zero progress may be permanently deleted with a confirmation dialog.

Priority: Must Have

Complexity: M

US-ADM-011: Live Class Scheduling

As a Super Admin or Moderator,

I want to schedule live classes with full control over details,

So that students can register and attend instructor-led sessions.

Acceptance Criteria:

- **Given** I navigate to the Live Class scheduler,
- **When** I create a new session,
- **Then** I configure: class title, description, instructor, date, start time, end time, capacity, pricing (free/paid), meeting link or integrated video platform.
- **And** the system prevents double-booking an instructor.
- **And** registered students see the class in their “Upcoming Live Classes” section.
- **And** reminder emails/notifications are automated.

Priority: Must Have

Complexity: M

8. Epic: User & Role Management

US-ADM-012: Moderator Management

As a Super Admin,

I want to create and configure moderator accounts,

So that trusted assistants can help manage the platform with appropriate boundaries.

Acceptance Criteria:

- **Given** I navigate to the Moderator Management page,
- **When** I add a new moderator,
- **Then** I assign: name, email, role (Moderator), and granular permissions.
- **And** configurable permissions include: publish courses, respond to support, schedule classes, review uploads, moderate reviews.
- **And** moderators CANNOT: delete super admin, view sensitive financial settings, change platform configuration, access security settings.
- **And** moderator actions are logged for audit.

Priority: Must Have

Complexity: M

US-ADM-013: Student Management

As a Super Admin,

I want to view and manage all student accounts,

So that I can support users and maintain platform integrity.

Acceptance Criteria:

- **Given** I navigate to the Students section,
- **When** I view the student list,
- **Then** I see: name, email, registration date, enrollment count, last active date, account status.
- **And** I can search and filter by name, email, status, enrollment date.
- **And** I can view a student's full profile, enrollments, progress, and transaction history.
- **And** I can suspend/activate accounts with a reason note.

Priority: Must Have

Complexity: M

9. Epic: Service & Support Management

US-ADM-014: Service Request Management

As a Super Admin or Moderator,

I want to view and manage incoming service requests,

So that I can respond promptly and convert enquiries into business.

Acceptance Criteria:

- **Given** I navigate to the Service Requests dashboard,
- **When** I view the list,
- **Then** I see all requests with filters: status (Received, Under Review, Responded, Scheduled, Completed), service type, submission date.
- **And** I can click any request to view full details and submitter information.
- **And** I can update status and add internal notes.
- **And** status changes trigger email notifications to the requester.
- **And** I can assign requests to specific team members.

Priority: Should Have

Complexity: M

US-ADM-015: Support Ticket Handling

As a Super Admin or Moderator,

I want to manage support tickets efficiently,

So that student issues are resolved quickly and satisfaction is maintained.

Acceptance Criteria:

- **Given** a support ticket is created,
- **When** I view the ticket queue,
- **Then** tickets are categorized by priority (Low, Medium, High, Critical) and status (Open, In Progress, Resolved, Closed).
- **And** I can assign tickets to myself or other moderators.
- **And** I can communicate with the student via threaded replies.
- **And** resolution triggers a satisfaction survey email.
- **And** SLA timers track response and resolution times.

Priority: Should Have

Complexity: M

10. Epic: Notifications & Communication

US-NOTIF-001: Announcement Publishing

As a Super Admin,

I want to publish platform-wide announcements,

So that I can communicate important updates to all users.

Acceptance Criteria:

- **Given** I compose a new announcement,
- **When** I publish it,
- **Then** I can set: title, message body, target audience (all students, specific courses, specific user segments), priority level, expiration date.
- **And** the announcement appears in the notification center of targeted users.
- **And** high-priority announcements trigger email delivery.
- **And** I can schedule announcements for future publication.

Priority: Should Have

Complexity: S

US-NOTIF-002: Admin Alert Configuration

As a Super Admin,

I want to receive alerts for critical platform events,

So that I can respond to issues before they impact students.

Acceptance Criteria:

- **Given** a critical event occurs,
- **When** the alert system triggers,

- **Then** I receive notifications for: new student registrations, successful purchases, failed payments, service requests, support tickets, course upload failures, upload completions, upcoming live classes.
- **And** I can configure delivery channels (in-app, email, SMS — future).
- **And** I can set quiet hours and digest frequency.

Priority: Should Have

Complexity: M

11. Non-Functional Requirements (Cross-Cutting)

US-NFR-001: Responsive Design

As a user on any device,

I want the platform to be fully functional and visually polished on desktop, tablet, and mobile,

So that I can learn and manage on my preferred device.

Acceptance Criteria:

- Layout adapts gracefully from 320px to 2560px width.
- Touch targets are minimum 44×44px on mobile.
- Navigation collapses to hamburger menu on screens < 768px.
- Video player supports fullscreen and picture-in-picture on mobile.

Priority: Must Have

US-NFR-002: Performance

As a user,

I want pages to load quickly and interactions to feel instant,

So that my experience is smooth and professional.

Acceptance Criteria:

- First Contentful Paint < 1.5s on 4G.
- Time to Interactive < 3.5s on average hardware.
- API response times < 200ms for 95th percentile.
- Video start time < 2s after click.
- Upload progress updates every 2 seconds.

Priority: Must Have

US-NFR-003: Accessibility

As a user with disabilities,

I want the platform to be accessible via screen readers and keyboard navigation,

So that I can learn without barriers.

Acceptance Criteria:

- WCAG 2.1 AA compliance.
- All images have descriptive alt text.
- Video content has captions/transcripts.
- Color contrast ratios meet standards (4.5:1 normal text, 3:1 large text).
- Focus indicators are visible on all interactive elements.

Priority: Must Have

US-NFR-004: Security

As a user,
I want my personal and payment data to be protected,
So that I can trust the platform with sensitive information.

Acceptance Criteria:

- All data transmission over HTTPS/TLS 1.3.
- Passwords hashed with bcrypt (cost factor 12).
- Payment data never touches our servers (tokenized via gateway).
- Role-based access control enforced on every API endpoint.
- Rate limiting on authentication endpoints (5 attempts / 15 min).
- OWASP Top 10 mitigations implemented.

Priority: Must Have

12. Story Map Summary

Epic	Key Stories	Priority	Complexity
Guest Experience	US-GUEST-001 to 006	Must Have	S-M
Student Auth & Onboarding	US-STU-001 to 003	Must Have	S-M
Student Dashboard & Learning	US-STU-004 to 015	Must Have	S-L
Admin Dashboard & Operations	US-ADM-001 to 005	Must Have	S-L
Course Management	US-ADM-006 to 011	Must Have	M-XL
User & Role Management	US-ADM-012 to 013	Must Have	M
Service & Support	US-ADM-014 to 015	Should Have	M
Notifications	US-NOTIF-001 to 002	Should Have	S-M
Non-Functional	US-NFR-001 to 004	Must Have	—

13. Definition of Ready

A user story is considered **Ready** when:

1. It follows the Connextra format (As a... I want... So that...).
2. Acceptance criteria are written in Given-When-Then format.
3. Dependencies and blockers are identified.
4. UI/UX mockups or wireframes are attached (where applicable).
5. The story is estimable by the development team.
6. Business value is clearly articulated.

14. Definition of Done

A user story is considered **Done** when:

1. All acceptance criteria are met and demonstrable.
2. Code is peer-reviewed and merged to the main branch.
3. Unit test coverage ≥ 80% for new logic.
4. Integration tests pass for all affected endpoints.
5. UI matches approved designs (pixel-perfect where specified).
6. Accessibility audit passes (axe-core, zero critical violations).
7. Performance budgets are met (Lighthouse score ≥ 90).
8. Documentation is updated (API docs, user guides).
9. Product Owner accepts the story in the staging environment.
